Question	Response
Comment on strengths and weaknesses of the instructor	I highly enjoyed the instructor and he helped ensure all students were confident in the material. In addition, Mr. Zhang helped set all students up for success and cared about every individuals learning. I would take this professor again if I have the opportunity.
Give suggestions on how the course or how the instruction could be improved.	Mr. Zhang made economics a highly enjoyable class and he cared deeply about the subject and the students.

Comment on strengths and weaknesses of the instructor	This dude was legit. He always came prepared for class and was able to answer our questions. He went over homework and tests, which was helpful. He put the content in a way that we could understand what we needed to know.
Comment on strengths and weaknesses of the course	Pretty good course, a little dry but does not cover anything extra.
Give suggestions on how the course or how the instruction could be improved.	Nothing much, fair course for the first of many economics courses.

Comment on strengths and weaknesses of the instructor	Very attentive and enthusiastic. Always had a good attitude. Explained material well.
-----	-----
Comment on strengths and weaknesses of the instructor	The instructor was good at explaining concepts during the class. I liked that he included calculus.
Comment on strengths and weaknesses of the course	The course covered a lot of material and I would have liked to have more practice applying the concepts.
Give suggestions on how the course or how the instruction could be improved.	Give more practice material throughout the course.

Comment on strengths and weaknesses of the instructor	I love Chi Zhang, he is my favorite teacher, but if the class content was harder, I am not sure I would have understood all of the material. Slides have a lot of grammatical mistakes and flips through the notes slides really fast so it is hard to keep up with notes as a whole. Overall, I still think he is an amazing teacher and is still learning!
Comment on strengths and weaknesses of the course	I had a really fun time in this course as a whole. Zhang is very humorous and has fun with what he is doing.
Give suggestions on how the course or how the instruction could be improved.	Maybe work on fixing the grammatical mistakes in the powerpoints and really enunciate the difference between many terms. Many times you were talking about one thing and I had miss heard it and thought you were talking about another and then I had to play catch up for a minute or two

Comment on strengths and weaknesses of the instructor	He was hard to understand and his examples didn't make sense sometimes.
-----	-----
Give suggestions on how the course or how the instruction could be improved.	More examples of math related problems
